Sensible Sales Management

Visualize your sales process and improve the way you manage your prospects and pipeline

(Card view, full screen mode)

Enterprise Edition

The Enterprise Edition goes far beyond the capabilities of most CRMs on the market today, and contains a plethora of vital features and modules needed to run your business more efficiently and profitably, from end to end. Mothernode Enterprise is the most versatile and robust CRM in its class. This Edition contains all the features and modules available in every Mothernode CRM Edition we offer.

Contact Management

Making connections is paramount to business success. With Mothernode, contact interaction has never been easier to manage. A single screen provides snapshots and allows quick access to all contacts, making communication fast and efficient.

Account Management

Customer Account Management provides you with access to all transactions, notes and customer communication. Nurturing customers and maintaining relationships is now within the tips of your fingers.

Collaboration

Mothernode's collaboration tools allow you to stay updated on customer accounts in real-time, whether in the office or away. These social networking tools provide constant updates of your customers' activities, ensuring you never miss an important event from followers or those whom you follow.

Opportunities

Quick lead follow-up results in more sales, while delays kill deals. The automated tools in Mothernode's Enterprise edition helps improve lead management capabilities and keeps you connected to opportunities—as soon as they become available.

Sales Management

Increasing leads and boosting sales now takes fewer resources when using the Sales Management module. Automated reporting, comprehensive dashboards and a wide array of tools help you manage your sales team more efficiently and profitably, regardless of its size.

Mobility

Most successful sales teams are 'in the field' closing deals—not hanging around in the office. Managing leads and sales from mobile devices is now easier and more efficient, when using Mothernode's wide assortment of collaboration tools.

Mothernode CRM ENTERPRISE EDITION

Workflow Transactions

The hard work doesn't begin until after a sale is made. Workflow Transactions supplies your business with all the right tools to streamline and improve customer order fulfillment. Spending more time with current and prospective customers is mandatory for maintaining relationships and expanding your customer base. Mothernode Enterprise helps increase customer satisfaction while improving your workflow, regardless of your business or industry.

- ✓ Quotes
- ✓ Orders (Sales Orders)
- ✓ Purchase Orders
- ✓ Work Orders

- ✓ Invoices
- ✓ UPS Worldship™ Integration

Lead Capture Forms

Without effective lead capture, your company loses cash on a daily basis. Mothernode's Customizable Lead Capture Forms helps businesses increase incoming leads with forms that adapt perfectly to your website, landing pages and even social media platforms. Attract more leads into your funnel and close more deals, with less hassle.

Marketing Automation

Improve your sales conversions and your overall customer experience. Automating your communications and follow-ups save you time and money, and keep you engaged throughout your sales process and connected to your customers. Whether mass emailing or lead nurturing, Mothernode CRM gives you the state of the art digital marketing you need throughout your customer lifecycle.

KPIs, Reporting and Dashboards

The right decisions for your business requires precision, real-time business intelligence that you can depend on. Mothernode gives you the information you need on to effectively monitor, forecast and act quickly. KPIs (key performance indicators) deliver comprehensive set of parameters that help you understand your business clearer. Mothernode also takes the pain out of reporting, by automating and scheduling reports, sending them right to your inbox.

Inventory

Mothernode's Advanced Inventory module provides businesses with the tools to create sales orders faster and customer quotes easier, even if your business doesn't stock physical inventory. Track sales, group similar items in inventory bundles for better organization, apply multi-level pricing and so much more.

Vendor Management

Vendor mismanagement can quickly result in operational delays, communication errors and loss of revenue. Mothernode's Vendor Management module is proven to improve relationships between both vendors and clients. Group your vendors based on their expertise and make more informed decisions, while using the module's purchase order tracking to prevent costly errors.

Field Services

Scheduling techs in the fields and assigning them work orders is a breeze with Mothernode. Quickly create work orders from sales orders or cases (for after market support) and assign them to individuals or teams. Mothernode even allows you to send work orders to third-party vendors when sub contracting work is necessary.

Case Management

Mothernode's Case Management module provides your sales team with detailed tracking for each individual case. Increase customer satisfaction and trust by using simple web forms to communicate with customers and manage cases. Accessing email, correspondence and customer information is quick and easy.

DIALOGUE™ by Mothernode

Real-time notifications let you stay connected to your customer activity and improve collaboration - across the office or around the world.

Glad to hear the presentation went well. Do we have any news on when they'll be short listing their finalists?

We've made the short list and have been asked to refine the pricing to include a 3 year agreement. Dave and I are working on that now.

Commented (April 21, 2015 @ 10:09 AM)

Great work. We're changing some of our key suppliers next year, that will allow us to be more aggressive in our pricing. Let me know when I can review your updated offer and I can give let you know where you can be more competitive if you need to be.

- Get started immediately!

Lead Nurturing

Build intelligent email sequences that distribute relevant content

Website Visitor Tracking

Turn your website into a powerful sales tool! Just because your prospects and customers aren't engaging with you personally, it doesn't mean they aren't interested in your brand, your message or your offering. Find out what your website visitors are really looking at. Get realtime notifications when your contacts visit your web pages and see which pages peak their interest most. Get the upper hand in your sales process.

✓ Supercharge Your Marketing

Enhance your digital marketing with extended visitor analytics. You already see which of your email recipients are clicking your links using Mothernode's email marketing analytics, but with website visitor analytics, you can follow their footsteps and see where your visitors are spending the majority of your time on your website.

✓ Track your Website Visitors

Capture the data you need to track your visitors and better understand their behavior and interests. Which of your site's pages are they hitting the most? How long are they spending on your website? which devices do they use to view your site? And so much more.

✓ Get Realtime Notifications

Mothernode lets you know when it's time to take action, by giving you realtime notifications when your customers, contacts and prospects are visiting your website.

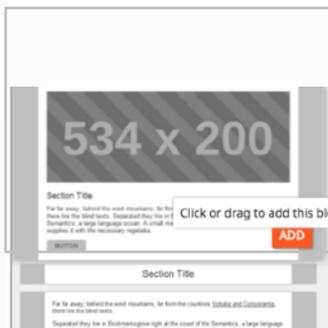

✓ Simple to Setup

Get started immediately! Quickly generate unique code for every website, blog or landing page you want to track. Simply install Mothernode's website tracking code by copying and pasting it in the header or footer of the sites you want to track, then sit back and observe!
